## EXPLANATION

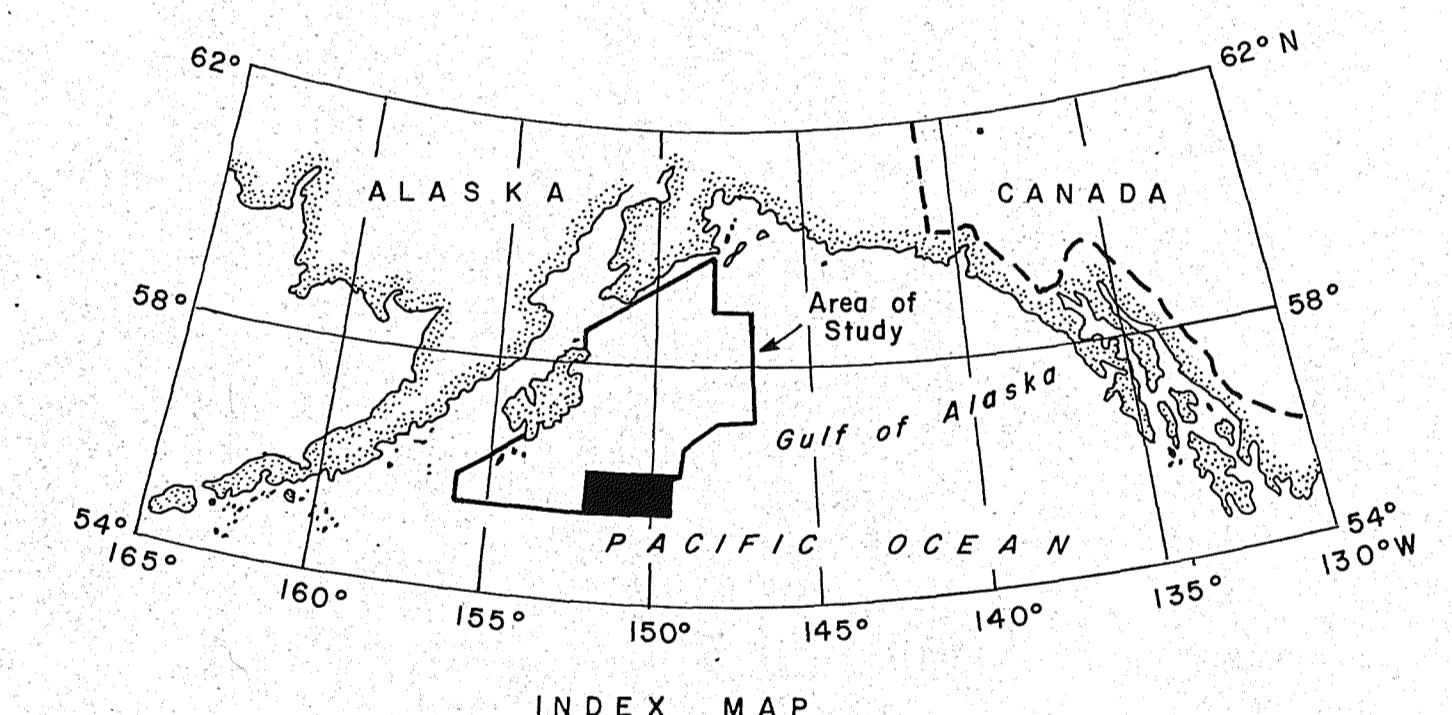

Contour Interval 10 meters on continental shelf.  
A 20 or 25 meter intervals used where space  
does not permit a 10 meter interval. 100 or  
500 meter intervals are used below the  
300 meter level depending on the density  
of data. Dashed lines indicate where data  
is sparse. Hachures pointing inward indicate  
enclosed depressions in the topography and  
and hachures pointing outward indicate  
isolated high areas.
